## **Healthy and Comfortable Heating with Bosch this winter!**

Did you know that hydronic heating is a method of heating that is well-known all around the world and has become more and more popular in Australia recently as the comfort and healthy benefits are evident? If you have been to Europe you may have experienced the unparalleled comfort hydronic heating provides through even heat distribution in the room and the amazing feeling of underfloor heating underneath your feet. But besides this and other benefits such as quiet operation, it can also help to reduce the effects of allergies and asthma as airborne particles such as pollen and dust are not circulated as is the case with gas ducted heating systems.

Using gas as the fuel for the hydronic heating boiler it is highly efficient and Bosch's condensing technology means that 91% of the gas put into the heating process is converted and used, whereas a standard gas heater will only use approximately 80% of the energy put into the heating process. The rest is usually lost through flue gases.

Bosch has recently launched a brand new video explaining the benefits of hydronic heating. Watch this video and learn more about this energy efficient product:

Bosch Hydronic Heating

*Robert Bosch (Australia) Pty. Ltd is a regional subsidiary and part of the global Bosch Group. Bosch has had a presence in Australia since 1907, and generated annual revenues of more than 555 million Australian dollars per annum in Oceania, and employed over 1,140 people working primarily in our Melbourne and Sydney locations in 2013. Our Australian activities cover a diverse range of product groups including security systems, power tools and accessories, automotive components and aftermarket parts, drives and control technology, solar energy, software innovations, hot water and heating systems, and communication center services.*

*The Bosch Group is a leading global supplier of technology and services. In 2013, its roughly 281,000 associates generated sales of 46.1 billion euros. (NB: Due to a change in accounting policies, the 2013 figures can only be compared to a limited extent with the 2012 figures). Its operations are divided into four business sectors: Automotive Technology, Industrial Technology, Consumer Goods, and Energy and Building Technology. The Bosch Group comprises Robert Bosch GmbH and its more than 360 subsidiaries and regional companies in some 50 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. In 2013, the Bosch Group invested some 4.5 billion euros in research and development and applied for some 5,000 patents. This is an average of 20 patents per day. The Bosch Group's products and services are designed to fascinate, and to improve the quality of life by providing solutions which are both innovative and beneficial. In this way, the company offers technology worldwide that is "Invented for life."*
